

3,5-Dimethylpyrazole

[View Details](#)

Introduction

CAS NO. 67-51-6

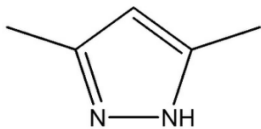

Classification

Agrochemicals->Fertilizer synergist

Coating & Adhesive ->Polyurethane sealant

Pharmaceutical and Intermediates->Intermediates

Product Description

Product Name	3,5-Dimethylpyrazole /3,5-DMP
CAS No.	67-51-6
Molecular Formula	C ₅ H ₈ N ₂
Structural Formula	
Molecular Weight	96.13
Purity	≥99.5%
Moisture	≤0.5%
Melting Point	106-108°C
Application	Polyurethane, isocyanate sealant. Nitrification inhibitor and nitrogen fertilizer synergist in fertilizer industry. The chemical is a heterocyclic organic compound and can be used as a pharmaceutical intermediate.
