

Triphosgene

[View Details](#)

Introduction

CAS NO. 32315-10-9

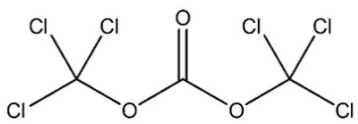

Classification

Dyes & Pigments ->Intermediates

Coating & Adhesive ->Others

Pharmaceutical and Intermediates->Intermediates

Product Description

Product Name	Triphosgene
CAS NO.	32315-10-9
Molecular Formula	C ₃ Cl ₆ O ₃
Structural Formula	
Molecular Weight	296.73
Appearance	white crystal
Purity	≥99.5%
Drying Weight Loss	≤0.5%
Melting Point	79.5-80.5°C
Ignition Residue	≤0.1%
Application	It can be used to synthesize chloroformate, isocyanate, polycarbonate and acyl chloride type products. It is an important intermediate in the production of antibiotics and other drugs.
